The report is gonna be full with 4 visualisation to answer 4 question :
what is the best breed in datasets?
What is the best gender in the best breed?
what is the relationships between Years and favorite counts ?
what is the rating at five best breed ?

Question 1 : what is the best breed in datasets?

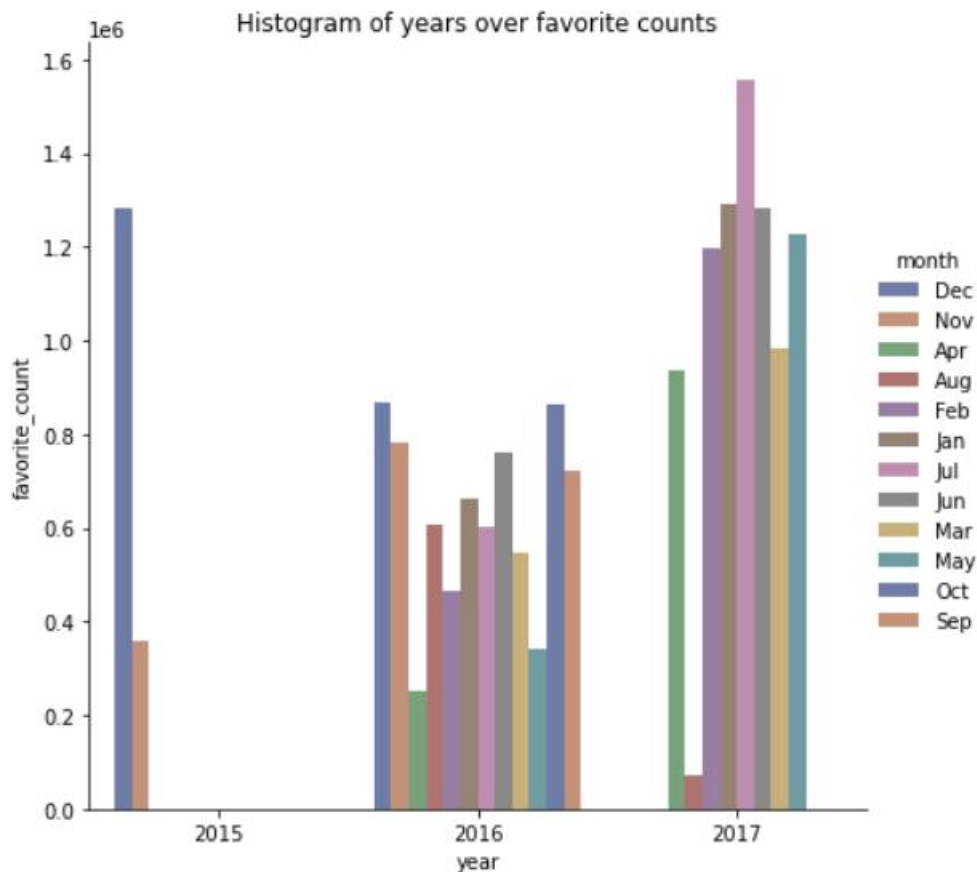

Histogram of The most Breeds has more favorite count

As we see here the golden_retriever is the best breed in favorite count , Golden retrievers are smart, loyal dogs that are ideal family companions. With their gentle nature, shining coats, and charming smiles, they are considered one of the most popular breeds in America. that is why has the best favorite count and best rating in this datasets

Question 2: what is the best gender in the best breed?

Male Golden Retriever has Most favorite count, and that is because Male Golden Retriever mature slower, and are goofier, more playful, and more affectionate

Question 3 : what is the relationships between Years and favorite counts ?

Histogram of years over favorite counts

As we see there is some months missing in every year ,that give us a no suitable view for distrubition of favorite count in every year. we can conclude that after every year the sum of favorite count is increase is due to more twitter user after every year .

Question 4 : what is the rating of the five best breed ?

scatters of The most Breeds has best rating

golden_retriever still has the best rating , all rating of golden_ratriever is more than 8 and the best rate is 14 not as other breed as chihuahua has 14 as max rate but 1 as minimale rate, also Pembroke has 4 as a minimale rate.

Conclusion

If you are thinking of adopting a dog , be sure to adopt a Golden_retriever
